BOOK SYNOPSIS

Neurofeedback is a scientifically proven form of brainwave feedback that trains the child's brain to overcome slow brainwave activity, and increase and maintain its speed permanently. Neurofeedback is quick, noninvasive and cost effective. In fact, 80 percent of the time, neurofeedback is effective without any of the side effects associated with drugs commonly used to such childhood disorders as autism, ADHD, dyslexia, sleep disorders, and emotional problems. Healing young Brains examines each disorder separately and explains in lay terms: the manifestation of the disorder, the diagnosis, and the rationale for treating the disorder with brainwave training. Healing Young Brains is parents' guide to all they need to know about treating their children with neurofeedback as an alternative to drugs.
