BOOK SYNOPSIS

A timely, passionate argument for planning end-of-life care. This is a powerful short book that combines Dr. Overton's rare frontline reportage on common end-of-life practices with her professional frustration at Harvard's highest (and most disconnected) level of health care discourse -- as well as her insight into her own family experience. Overton is an acclaimed memoirist, and this timely polemic is in perfectly in tune with a hot-button political topic and new rules in Medicare practices.
